UNITED STATES FOREIGN TRADE

SUMMARY REPORT
FT 985

JANUARY — DECEMBER 1957

FOR RELEASE
August 20, 1958

WATERBORNE FOREIGN TRADE STATISTICS

COVERAGE

This report presents statistical year figures on total United States waterborne inbound and outbound shipments made in foreign trade, with the exception of such elements as are specified below. Statistical year figures for 1957 represent the aggregate of transactions processed during the twelve monthly statistical periods January-December 1957, including some shipments unladen from and laden on vessels during the latter part of 1956 and omitting some late shipments made during 1957 for which information was not received in time to be included in the statistical year figures. Calendar year figures for 1957, representing shipments unladen from and laden on vessels arriving or departing during the interval January 1-December 31, 1957 (excluding late 1956 transactions included in the 1957 statistical year figures and including late 1957 transactions which were excluded), will be issued subsequently. For a fuller explanation of the differences between the statistical and calendar year figures see the July 1952 issue of Foreign Trade Statistics Notes.

The waterborne statistics presented in the monthly issues of this report excluded completely exports of domestic and foreign merchandise and non-Department of Defense shipments of "special category" commodities valued at (a) less than $500 during 1955 and beginning with July 1956 and (b) less than $1,000 for the period January-June 1956. In addition, import shipments of under 2,000 pounds regardless of value as well as shipments valued at less than $100 regardless of shipping weight were excluded from the monthly issues of this report during 1956 and 1957. In order to provide users of the vessel statistics with a series of comparable annual data on a statistical year basis, this report shows in addition to the detail for the fully compiled export shipments and import shipments of 2,000 pounds or more (comparable to the monthly data), total figures (combining sample estimates of the low-value export shipments and the less than 2,000 pounds import shipments of $100 or more in value with the complete coverage segments for exports and imports) on the United States port level and trade area level. These total figures for 1957, which include the estimates, are comparable to the data shown for prior years.

The statistics on low-value export shipments of domestic and foreign merchandise are estimated on the basis of a 10 percent sample of such shipments. A discussion of the low-value export shipments in the vessel statistics is contained in the November 1953 and February 1956 issues of Foreign Trade Statistics Notes. In addition, data on the shipping weight and value of import shipments of under 2,000 pounds with a value of $100 or more are estimated on the basis of a 2 percent random sample of import documents. A discussion of the under 2,000 pound shipping weight import shipments in the vessel statistics is contained in the March 1954 issue of the Foreign Trade Statistics Notes.

Vessel export figures in this report, shown in columns 5, 10, 14, and 19 of table 1 and in table 3, represent exports of domestic and foreign merchandise laden at the United States Customs area (Continental United States, Puerto Rico and the Territories of Alaska and Hawaii) for shipment to foreign countries and include export shipments to United States civilian government agencies and non-Department of Defense controlled foreign aid program shipments as described below. Excluded from these figures are shipments to the United States armed forces abroad of supplies and equipment for their own use as well as the other types of shipments described below for which information is shown in separate columns in table 1.

Department of Defense controlled and "special category" figures, shown in columns 7 and 12 of table 1 and in table 5 of this report cover consolidated data for the following types of shipments:

1. Vessel export shipments of Department of Defense controlled cargo under special foreign aid programs, i.e., Foreign Operations Administration, Army Civilian Supply, etc., made aboard United States flag vessels such as Army-Navy transports or commercial vessels chartered by the Department of Defense under time, voyage and space charter arrangements and including "special category" commodities without distinction.

2. Vessel export shipments of "special category" commodities not controlled by the Department of Defense for which detailed information cannot be shown separately because of security reasons. For an explanation and list of "special category" commodities and their presentation in foreign trade statistics see the January 1954 issue of Foreign Trade Statistics Notes.

Only shipping weight data in terms of United States port or coastal district of lading are shown for these classes of shipments since information on the dollar value of exports of Department of Defense controlled cargo is not available at this level of detail. Consequently, the total value figures shown in columns 15 and 18 of table 1 for dry cargo and tanker shipments in that order correspond to the shipping weight figures shown in columns 4 and 9, respectively, of the same table.

Vessel import figures, shown in columns 4, 7, 12 and 15 of table 2 and in table 4 of this report, are general imports and represent the total of imports for immediate consumption plus entries into customs bonded storage and manufacturing warehouses made at the United States Customs area from foreign countries. Vessel import figures exclude American goods returned by the United States armed forces for their own use, import shipments on Army or Navy transports, and shipments covered by informal entries.

The following types of shipments are excluded from both the vessel export and import data: (1) All shipments of under $100 in value, regardless of shipping weight; (2) shipments of household and personal effects; (3) shipments by mail and parcel post; and (4) shipments of vessels under their own power and afloat. Trade between the United States and its Territories and Possessions and trade between the Territories and Possessions are not reported as United States exports and imports.

Merchandise shipped in bond through the United States in transit from one foreign country to another without having been entered as an import is not included in any of the figures in the columns previously referred to (imported merchandise cleared through customs and subsequently re-exported is included in both the import and export statistics). Separate information for the waterborne portion of the in-transit trade in terms of shipping weight and dollar value is presented in this report in tables 1 and 2. Columns 6, 11, 17 and 20 of table 1 reflect in-transit merchandise

laden aboard vessels at United States ports, while columns 5, 8, 13 and 16 of table 2 reflect such merchandise unladen from vessels. The waterborne outbound and inbound in-transit statistics include: (1) foreign merchandise transferred from one vessel to another in the United States port of arrival and shipped to a foreign country without being released from customs custody in the United States; and (2) foreign merchandise arriving by vessel at one United States port, shipped through the United States under customs bond, and leaving the United States by vessel from a port other than that at which it arrived. In addition, the waterborne outbound in-transit statistics also include (1) foreign merchandise withdrawn from a general order warehouse for immediate export by vessel or for transportation and export by vessel (such merchandise was not recorded as an import when it entered the warehouse), and (2) foreign merchandise shipped by vessel from a United States Foreign Trade Zone to a foreign country (such merchandise is deposited in the Foreign Trade Zone without being entered as an import). Any inbound or outbound in-transit merchandise moving by methods of transportation other than vessel is excluded from the in-transit statistics. Thus, in-transit merchandise arriving at the United States by vessel and leaving by some other method of transportation is included in the inbound data only. On the other hand, in-transit merchandise arriving by other than waterborne transportation and laden aboard vessels upon departure is included in the outbound statistics but not in the inbound data. The inbound and outbound segments, therefore, do not counterbalance one another and are complementary only insofar as they involve merchandise carried by vessels to and from the United States. For a more detailed discussion of the in-transit trade statistics and the types of shipments excluded from these data see the February 1953 issue of the Foreign Trade Statistics Notes.

All types of outbound vessel shipments in tables 1 and 5 are credited to the coastal districts, customs districts, and ports at which the merchandise was laden. All types of inbound vessel shipments in table 2 are credited to the coastal districts, customs districts, and ports at which merchandise was unladen. In the case of vessel general imports this is not necessarily the same as the customs district in which the goods were entered into warehouse or entered for immediate consumption.

Vessel exports in table 3 are credited to the foreign trade areas at which the merchandise was unladen. Vessel imports in table 4 are credited to the foreign trade areas at which the merchandise was laden aboard the vessels carrying the cargo to the United States. The countries of destination or origin of merchandise are not necessarily located within the trade areas to which the merchandise is shipped or from which it is received. Detailed definitions of foreign trade areas in terms of the countries and ports included in each are contained in Schedule R, Code Classification and Definition of Foreign Trade Areas.

Shipping weight figures represent the gross weight of shipments, including the weight of containers, wrappings, crates and moisture content. Vessel export values represent the values at time and place of export. They are based on the selling price (or on the cost if not sold) and include inland freight, insurance and other charges to place of export. Transportation and other costs beyond the United States port of exportation are excluded. Vessel import values, as well as the values for in-transit shipments, are generally based on the market or selling price and are in general f.o.b. the exporting country. Since in-transit merchandise is not subject to the imposition of import duties at the United States, the valuation reported for such shipments is not verified by customs to the extent applicable in the case of import entries and may in some cases include transportation costs and insurance to the United States as well as other cost elements.

Vessel shipments in tables 1 and 2 are classified as dry cargo or tanker shipments solely on the basis of the type of vessel used without regard to the cargo carried. Tanker vessels are those primarily designed for the carriage of liquid cargoes in bulk, while all others are classified as dry cargo vessels. A further segregation of dry cargo vessel shipments is provided in tables 3-5 on the basis of type of service, i.e., liner (berth) or irregular (tramp). Liner service is that type of service offered by a regular line operator of dry cargo vessels on berth. The itineraries and sailing schedules of such vessels are predetermined and fixed. Irregular or tramp service is that type of service afforded by dry cargo vessels which are chartered or otherwise hired for the carriage of goods on special voysges. Vessels in this type of service are not on berth and their sailing schedules are not predetermined or fixed.

Table 1.—SHIPPING WEIGHT AND VALUE OF UNITED STATES WATERBORNE EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE, OUTBOUND IN TRANSIT MERCHANDISE, AND SHIPMENTS OF DEPARTMENT OF DEFENSE CONTROLLED CARGO AND "SPECIAL CATEGORY" NON-DEPARTMENT OF DEFENSE CONTROLLED CARGO, ON DRY CARGO AND TANKER VESSELS, BY CUSTOMS DISTRICT AND PORT OF LADING: JANUARY-DECEMBER 1957

Totals are given for all customs districts at which there are vessel shipments. Only those ports are shown whose combined export and import tonnage average 1 million pounds or more per month during calendar year 1956. Customs district totals are for all ports in the district including those not shown. Totals represent the sums of unrounded figures, hence may vary slightly from the sums of the rounded amounts.

*Denotes less than 50,000 pounds; less than 50,000 dollars. [1]Figures based on complete coverage of shipments valued at $1,000 or more for the period January-June 1956 and shipments valued at $500 or more starting July 1956. [2]The January-June 1956 figures are based on complete coverage of shipments valued at $1,000 or more and an estimate based on a 10 percent sample of the $100-$999 shipments. Starting July 1956 these figures are based on complete coverage of shipments valued at $500 or more and an estimate based on a 10 percent sample of the $100-$499 shipments. The chances are 2 out of 3 in the long run that the sampling error for the shipping weight figures which include estimates for the low-value shipments is less than one percent or less than 50,000 pounds unless otherwise noted. The sampling error for the value figures which include estimates for the low-value shipments is less than one percent or less than $50,000 unless otherwise noted. [3]The grand totals for value (columns 13 and 14) are not strictly relative to the grand totals (columns 1 and 2) for shipping weight due to the exclusion of value data for exports of Department of Defense controlled cargo and "special category" commodities. [4]Florida Atlantic Coast port totals should be added to Florida Gulf Coast port totals to obtain total exports through the Customs District of Florida. [5]The sampling error is between 1 and 5 percent. [6]The sampling error is between 10 and 15 percent.

Table 2.—SHIPPING WEIGHT AND VALUE OF UNITED STATES WATERBORNE GENERAL IMPORTS AND INBOUND IN-TRANSIT MERCHANDISE, ON DRY CARGO AND TANKER VESSELS, BY CUSTOMS DISTRICT AND PORT OF UNLADING: JANUARY-DECEMBER 1957

Totals are given for all customs districts at which there are vessel shipments. Only those ports are shown whose combined export and import tonnage averaged 1 million pounds or more per month during the calendar year 1957. Customs district totals are for all ports in the district including those not shown. Totals represent the sums of unrounded figures, hence may vary slightly from the sums of the rounded amounts.

Customs district and port	Shipping weight in millions of pounds							Value in millions of dollars

*[illegible] less than 50,000 pounds; less than $50,000 dollars. [1]Figures based on complete coverage of shipments weighing 2,000 pounds or more and over $100 in value, and an estimate of the less than 2,000 pound shipments valued at $100 or more based on a 2 percent sample of the import documents. The chances are 2 out of 3 in the long run that the sampling error for the shipping weight figures which include estimates for the under 2,000 pound shipments is less than one percent or less than 50,000 pounds, unless otherwise noted. The sampling error for the value figures which include estimates for the under 2,000 pound shipments is generally less than 1 percent or $50,000, unless otherwise noted. [2]Florida Atlantic Coast port totals should be added to Florida Gulf Coast port totals to [illegible] total [illegible] through the [illegible] District of Florida. [3]Sampling error is between 1 and 5 percent.

Table 3.—SHIPPING WEIGHT OF UNITED STATES EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE ON DRY CARGO AND TANKER VESSELS, BY TRADE AREA, TYPE OF SERVICE, AND AMOUNT CARRIED ON UNITED STATES FLAG VESSELS: JANUARY-DECEMBER 1957

(Data in millions of pounds. Totals represent the sums of unrounded figures, hence may vary slightly from the sums of the rounded amounts)

*Denotes less than 50,000 pounds. [1]Figures based on complete coverage of shipments valued at $1,000 or more for the period January-June 1956 and shipments valued at $500 or more starting July 1956. [2]The January-June 1956 figures are based on complete coverage of shipments valued at $1,000 or more and an estimate based on a 10 percent sample of the $100-$999 shipments. Starting July 1956 these figures are based on complete coverage of shipments valued at $500 or more and an estimate based on a 10 percent sample of the $100-$499 shipments. The chances are 2 out of 3 in the long run that the sampling error for the figures which include estimates for the low-value shipments is less than one percent or less than 50,000 pounds. [3]Classification of dry cargo vessels as "liner" or "irregular or tramp" is based on characteristics of each voyage (whether the voyage is part of a scheduled berth operation, etc.) using the classification criteria of the Maritime Administration.

*Less than 500 pounds.

[1]Figures based on complete coverage of shipments valued at $1,000 or more for the period January-June 1956 and shipments valued at $500 or more starting July 1956.

[2]The January-June 1956 figures are based on complete coverage of shipments valued at $1,000 or more and an estimate based on a 10 percent sample of the $100-$999 shipments. Starting July 1956 these figures are based on complete coverage of shipments valued at $500 or more and an estimate based on a 10 percent sample of the $100-$499 shipments. The chances are 2 out of 3 in the long run that the sampling error for the figures which include estimates for the low-value shipments is less than one percent or less than 500 pounds unless otherwise noted.

[3]The sampling error is between 1 and 5 percent.
